

PACO PUMPS—

from raw water intake to wastewater treatment

For more than 90 years, PACO has supplied the water and wastewater industry with a wide range of high-quality, long-lasting pumps. Our customers have come to rely on our innovative engineering, quality manufacturing, and after-sale customer service. They expect us to provide them with pumps that will do the job day after day, month after month, and year after year. They know we'll deliver.

PACO offers the industry's broadest selection of fluid handling pumps under one name – dry pit non-clogs, wet pit column non-clogs, submersible, end suction, in-line, split case double suction, and a variety of other special-purpose pumping units and systems such as raw water, sewage, high rise, municipal, and turf irrigation.

Backed by performance, quality, and service, PACO covers a broad spectrum of facilities – municipal, commercial, residential, industrial, process, and recreational.

Call a PACO application engineer today for details on how we can meet your needs – efficiently and cost-effectively.
